U.S. House of Representatives  
2350 Rayburn Building  
Washington DC 20515-0550

Subject: Funding for SR-56/I-5 Connectors

Dear Congressman Cunningham:

In order to meet the transportation requirements of the San Diego region, the completion of a number of important transportation projects in the next few years is critical. One of the most significant projects needing your continued support is the funding for the two missing connectors at the State Route 56 (SR-56)/Interstate 5 (I-5) interchange.

With the completion of State Route 56 in 2004, San Diego will have created another important east-west freeway link between the I-5 and Interstate 15 (I-15) corridors. This will help reduce traffic congestion on these major north-south freeways in San Diego County. However, the lack of funding for the missing west-to-north and south-to-east SR-56 connectors will result in freeway traffic being diverted to local streets which also will add to the congestion on I-5 and I-15.

Earlier this year, the San Diego Association of Governments issued its MOBILITY 2030 Regional Transportation Plan which includes smart-growth scenarios that will benefit both the business sector and residential communities. MOBILITY 2030 includes funding for the two missing connectors, but the earliest completion date would be 2010, and the completion date could slip to as late as 2014. If the connectors are not completed by 2008, the business and residential growth in this part of north San Diego County will be forced to move to other San Diego communities, the unincorporated county, south Riverside County, or even Tijuana. Completing the connectors will improve traffic flow and will be more cost-effective than building the additional infrastructure that will be required on other roadways if the missing connectors are not built.

The funding of the two missing connectors is vital to the long-term growth and prosperity of the San Diego County region, and your assistance in securing funding for this project will benefit San Diegans for years to come. Thank you for your continued efforts.

Sincerely,

Michael S. Chapin
